

CANADA PIPELINE ACCESSORIES

Benefits of Buying the CPA 50E Flow Conditioner

- Huge inventory allows from stock shipment for most commonly used sizes and schedules.
- CPA personnel have been actively involved in industry metering committees and trade groups for more than 25 years.
- Independent testing shows significant improvement of most meters performance when used with the CPA flow conditioners.
- CPA provides unquestionable technical support on behalf of our and your customers (technical papers, one on one visits and phone/email correspondence).
- Service oriented (we do our best to meet required delivery dates).
- Product quality control.
- Approvals (the CPA 50E is accepted by most major oil and gas companies).
- Meets and exceeds all applicable US and International measurement standards.
- In many cases, CPA eliminates further escalation of measurement disputes by immediately correcting measurement misunderstandings.
- Design assistance and advice for applications.
- Solid technical resource for measurement and Flow Conditioner information.

CPA Flow Conditioners – Not just a plate with holes!
